

## ECOSOCS Handover

Tiny Forest is a citizen science project aiming to understand ecosystem service provision, and the factors affecting their provision, by small, urban Miyawaki forests. ECOSOCS is a program through which you can work, with support from Earthwatch Europe, to lead community engagement events and use Tiny Forest activities to support the goals of your membership and society.

You can access all Tiny Forest resources, the Tiny Forests in your network, and download your forests data, on the Tiny Forest portal:

**<https://tinyforest.earthwatch.org.uk/cb-login>**

**Username:**

**Password:**

If you need to add forests to your profile or make any other changes please contact Earthwatch Europe at: [tinyforest@earthwatch.org.uk](mailto:tinyforest@earthwatch.org.uk)

### **Earthwatch Europe Contact**

You can contact Earthwatch Europe at: [tinyforest@earthwatch.org.uk](mailto:tinyforest@earthwatch.org.uk) and you will be directed to the most suitable person.

### **Tiny Forest Resources**

You can find more information about Tiny Forest and opportunities for your society in the resources section on the Tiny Forest portal. Log-in, navigate to one of your forests pages and under 'Resources' within your Tiny Forests profile.

### **Onboarding**

Earthwatch Europe will arrange 2 webinars to welcome incoming committee members to ECOSOCS. These will be in June and September. If you can't make either of these webinars please contact Earthwatch Europe for assistance.
